Castries, Saint Lucia,
West Indies.

Mr. Ron B. Schiller,
7657 La. Bolsa Drive
Dallas , Texas 75248
U.S.A.
22 March 77

Dear Mr. Schiller,

Many thanks for your letter dated 12 March 77. Let me first apologise for the delay in verifying your original report. I thoroughly checked out that report, and we have good reason to believe that the station you heard on Jan 5 76 at 0300Atlantic, on a frequency of 660 Khz was indeed Radio St. Lucia.

Recently Radio St. Lucia moved into new studios, and our signal is now bigger and better than ever. So, you should be able to pick us up more easily now. At present, the station operates with 10Kw and programing is primarily intended for listeners in St. Lucia and neighbouring islands. However, we have been picked up by listeners in Norway, Sweden Italy, and of course USA.

The station is on the air daily from 0930GMT to 0315 Gmt, but on special occasions such as Carnival, Cricket and so on, we sometimes sign off as late as o700 Gmt. I myself did a lot of D X'ing at one time with and old PYE RX, but this was not good enough for my purposes, and, I am now looking for something more substancial. At my last count I had heard 75 countries. In future, If R.S.L. proposes any late night transmissions, I will convey the information to the National Radio Club, through Ernest Cooper or yourself.
